SMALL ENOUGH TO BE AGILE
LARGE ENOUGH TO BE GLOBAL
Vertex Aerospace is a Mississippi based U.S. Department of Defense and Department of State aerospace service provider of technical and supply-chain support, aircraft maintenance, product manufacturing, assembly services, and engineering solutions for both government and commercial platforms. We support 65 domestic and 35 international locations and maintain 6 FAA Part 145 Repair Stations. We are also a certified FAA 135 Operator. We have a proven record of providing total integrated solutions for our customers 24/7, around the world.
Vertex Aerospace offers our customers responsiveness and agility to changing requirements and the ability to provide surge staffing. For decades we have invested in developing and perfecting our procedures, processes, facilities, and logistics support alternatives to effectively resolve any issues associated with aircraft maintenance and supply chain activities. We provide solid, dependable contract performance while exceeding customer metrics.

“We provide services to our customers 24/7, around the world. We do it right the first time – because lives depend on it.”
